Software Developer

Saint Paul, MN • (507) 369 3608 • paulter17@gmail.com

SUMMARY

Full-stack software developer with 6+ years of experience designing and deploying scalable web applications, APIs, and automation solutions. Proficient in React/Typescript, VueJS, NodeJS, and SQL. Adept at translating business requirements into efficient systems that enhance data integrity, streamline workflows, and improve performance in Agile environments.

EXPERIENCE

Full-time · Remote

Software Developer

SeedWare

02/15/2020 — 07/25/2025

- Developed multiple new data entry forms within the ERP logistics inventory management platform for seed businesses, streamlining customer data, orders, and shipments across multiple regions.
- Developed a custom scheduling and automation app for updating clients, reducing manual scheduling time by 90%.
- Created REST APIs to integrate external client data with internal systems, improving data accuracy and eliminating hours of manual entry.
- Revamped the company's outdated main dashboard into a modern, responsive interface with real-time data visualizations and dynamic graphs powered by complex datasets.

PROJECTS

Viewpoints — Community Activity & Event Discovery App

04/01/2016 — Present

Created a mobile app that lets users see what's happening nearby in real time, from gyms and parks to sports events and malls. Displays crowd activity, live posts, and alerts when friends are at a location. Tech Stack: React Native, PostgreSQL, Google Cloud Platform

Rivals Sportsbook: Peer-to-Peer Sports Betting Platform

09/01/2025 — Present

Built a web platform that enables users to bet against friends or other players globally, to differentiate from traditional sports books. Developed a full-featured admin dashboard to monitor analytics, transactions, users, and active bets. Tech Stack: React, Firebase, Stripe, PayPal, Node.JS

EDUCATION

Bachelor of Science (BS) - Computer Science
Winona State University

08/24/2015 — 05/09/2019

SKILLS

Cloud & DevOps: Google Cloud Platform, AWS, Docker

Frontend: CSS3, React, HTML5, Vue.js

Database: Firebase, PostgreSQL, SQL Server

Backend: Spring Boot, Node.js

Programming Languages: PHP, JavaScript, Java

Others: CI/CD (GitHub Actions)
